ECS Configuration Change Request

CCR No. 96-1055B	**Logged Date** 10/30/96	**Rev.** B	**Request Type** CCR

Priority Routine **X** Urgent ☐ Emergency ☐	**Affected Release** B	**Change Class** I I

Title (description)
The RTM Component Class Population of Release B INS Components.

Documents Affected	**Source Nos** (RID, NCR, Action Item, GSFC CCR, etc.) **or Tech Reference** **Release B INS for AC-96-0367** (Do not close Action Item until notified by Originator)

RTM Change **X**   **Start New Baseline** ☐

Problem
Currently, the Release B INS design components and their links to Level_4 requirements do not exist in RTM MAIN. The RTM Component Class should be populated with the INS components and linked to their corresponding Level_4 requirements.

Proposed Solution
Populate the Component Class of RTM with the Release B INS components. Secondly, update the Level_4 requirements' verification status and requirement type, requirement status, and verification method (where needed) in order to make the component links in the RTM. Finally, link the components to their corresponding Level_4 requirements of the Level_4 Class. This CCR will load only the components developed by Release B. The Release B Level_4 requirements that reside in RTM will be linked to Release A and Release B components via this CCR.
